

ATELIER 001

LIGHTING COLLECTION
2022

WWW.ATELIER001.COM

INTRODUCTION

Operating from a London-based studio, Atelier001 is a luxury lighting brand celebrating artisanship by creating beautiful, collectible lighting objects with the highest attention to detail and finish.

The designs are curated by acclaimed lighting designer and artist, Eva Menz, who is committed to making exceptional light pieces more accessible to a larger audience. The fabrication of the lights also aims to support a network of unique makers in what are often described as ‘dying trades’.

Each Atelier001 piece is hand-finished by master artisans, who imbue these exclusive objects with their incredible skills. Each carefully considered detail attests to the dedication of the makers, while the individual touches and handmade quality celebrate the inherent beauty of authentic materials.

We encourage our audience to welcome and embrace the unique character within each object, its variations and small beautiful imperfections.

COSMIC COLLECTION

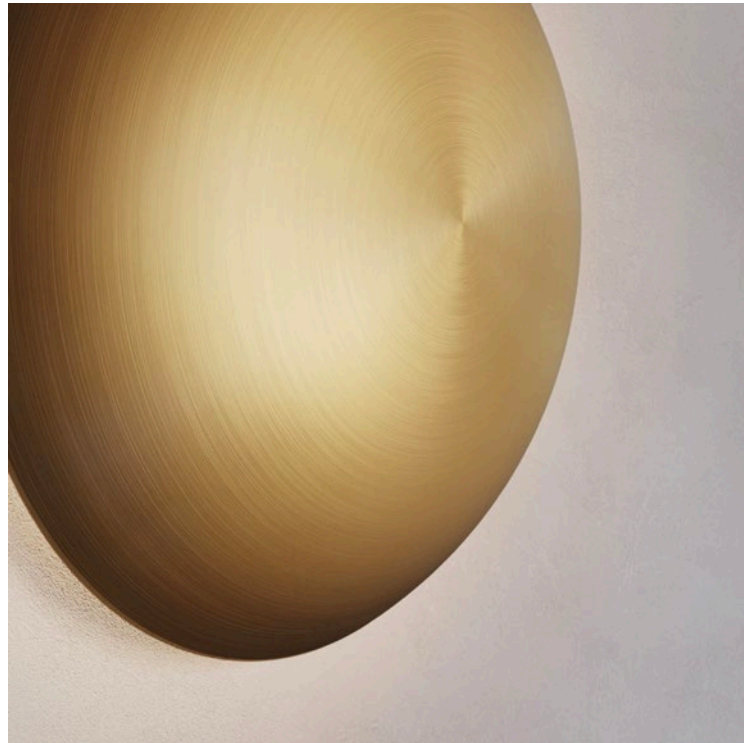

Working with metal is always magical. For the Cosmic collection we play with both shapes and patina finishes. The aim was to achieve terrestrial, possibly extra-terrestrial imitations of surfaces, and planet-like appearances. These textures, imaginary imagery and actual alchemy formed the basis of our inspiration.

Reflector plates are first shaped over a mould into a curve. The mould is carved out of wood, then either brass or copper is spun over it. This leaves the smallest patters, tracing a process

that is beautiful to observe. The plates are the metalworkers' canvas of painting. Oxidising, heat, acid, pigments, process, patience, getting it wrong and starting all again. Bronzing, acid and heat treatment is applied to this collection, and each plate varies slightly and intentionally.

The process of brushing, spraying, splashing and polishing results in a variety of finishes, giving each piece of Cosmic an individual touch. It is the perfect demonstration of the interaction between the material and craftsmen.

COSMIC COLLECTION

COMET PURION

DIMENSIONS
Ø 20cm (7.9") | Depth 7cm (2.8")
Ø 26cm (10.2") | Depth 9cm (3.5")

WEIGHT
3kg (6.6lbs)

MATERIALS
Satin brass framework
Hand-spun brass plate

FINISH
Gloss or matt white lacquer;
Please note that each piece is hand-finished and will vary slightly in patterns and textures.

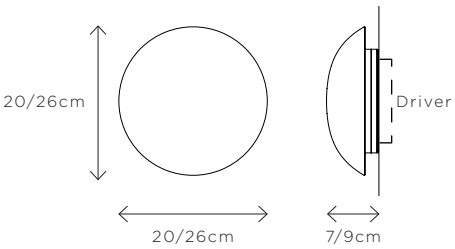

LEAD TIME
10-12 weeks excl. shipping

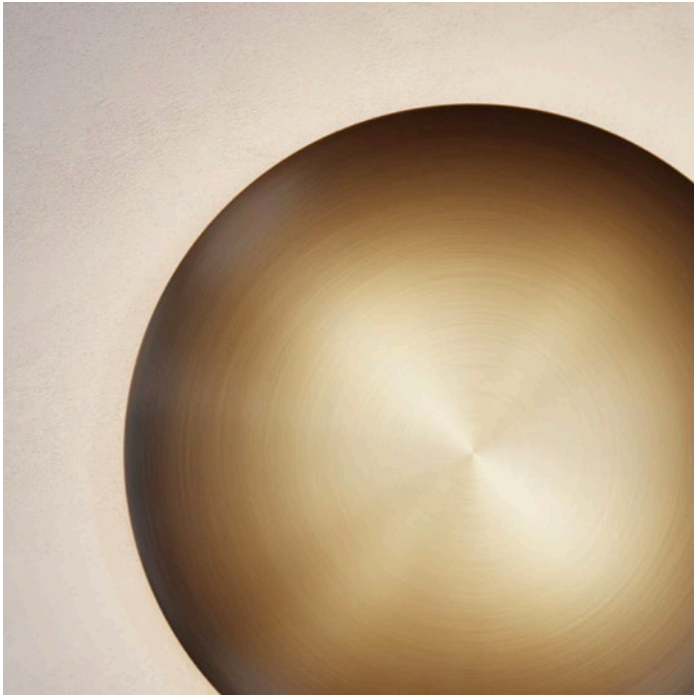

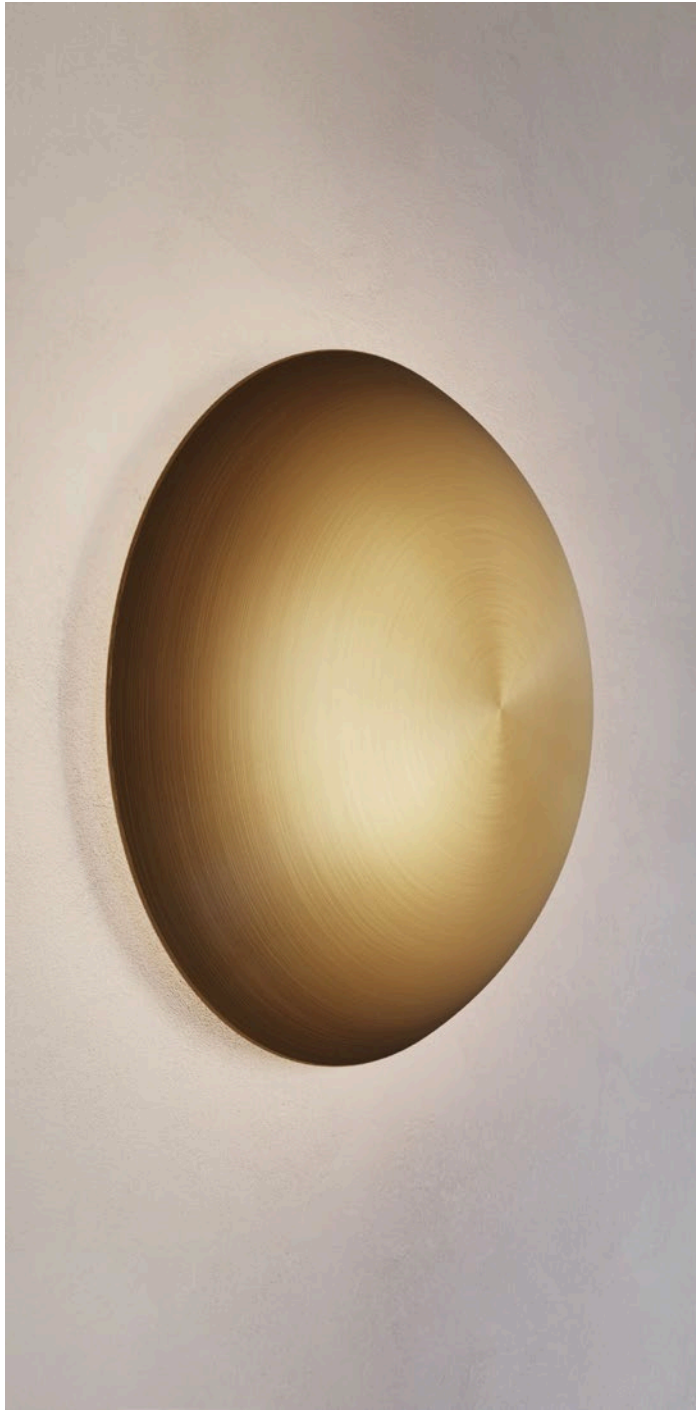

ILLUMINATION
Integrated LED (No bulb required)
LED colour temperature 2700K
LED dimmable driver
Output 24V 6W 750lm
Input 120/240V
50,000 hours rated life

LED DRIVER LOCATION
Mains dimming: Integrated in fixture;
0-10V, 1-10V and Dali Dimming: To be integrated into wall.

WALL MOUNTED
All components supplied.

REGION
CE certified;
UL listing available at a surcharge.

LIQUID COLLECTION

Inspired by the fluid forms, reflections and mesmerising light play of water shapes, the signature concentric glass shades of the Liquid lamps are individually handmade by a master artisan with over 25 years of experience in glassmaking.

The collection found its genesis and evolution through the exploration into the temperament and limitations of glass. The process of glass-blowing is one of mastery, best described as a dance in

which the artisan moves rhythmically from flame to bench guided by the material's properties: its fluidity, melting points and hardening schedules. The hand-forming and twisting of the material as well as the blending in of smooth colour gradients result in subtle and intentional imperfections.

Enhanced with minimal yet advanced LED technology, the glass plates shine and project its gradient patterns onto the wall, Each Liquid wall piece is a celebration of unique craftsmanship.

CITYSCAPE COLLECTION

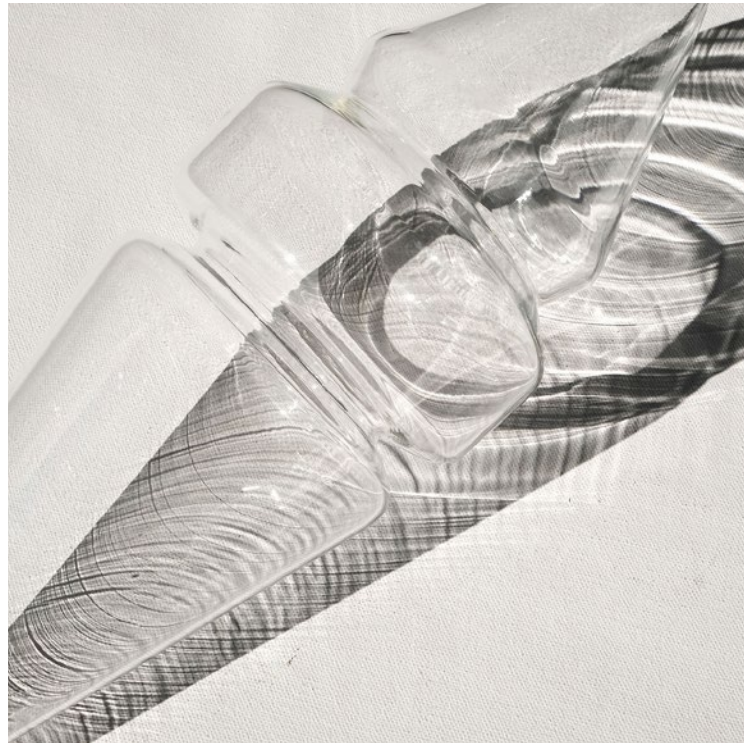

The Cityscape collection originates from drawing a single silhouette, an outline. This is what we began with, but through a delicate process, the line is turned into a three-dimensional object. Illumination brings it all to light revealing the finest lines and smallest details.

To enable this process, Atelier001 collaborates with a workshop that is experienced with scientific glass for nearly half a century. Shaping medical glass requires extreme patience, tenacity and concentration. It's clear that a glassblower requires

the ability to be a problem-solver, and a logical but creative thinker, with patience, dexterity and ability to control with precision - even one's own breath. Such a craft involves much artistry and technique.

The result of this careful shaping is a delicate and yet very toughened glass vessel. We enrich it with a single light source, implemented as suspension and as illumination. The intention is to cast mesmerising shadows and a play of light on its surroundings, adding to the sculptural features of a space.

CANVAS COLLECTION

Inspired by the beauty and simplicity of traditional lantern forms, the design of the Canvas collection started with an aim to create a warm, pure lighting atmosphere through minimal shapes and authentic materials.

The lanterns focus on the materiality of natural silk. Silk-making involves nature, individuals and craftsmanship, a process that requires absolute patience and precision, and a traditional skill that

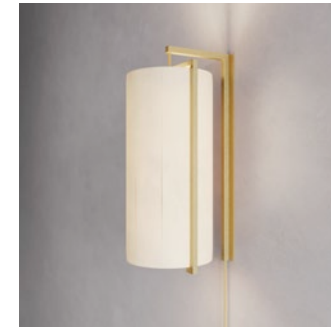

is often passed on for generations. Once the shade is completed, it is combined with finely brushed brass framework then softly illuminated with LED lighting technology from within. It is apt for both modern and classic interiors.

Just like a blank canvas where ideas are brought to life, we invite you to request bespoke versions of Canvas pieces with your chosen colours, finishes and dimensions.
